How to make a recycled pasta cloud!

All you need: card/paper, pasta tubes, string, pen/pencil, scissors and tape

Draw your cloud and cut it out. Cut the string in to lengths and thread the pasta tubes on the string. Tie a knot in the bottom of the string and stick it to the last pasta tube. Or you can use a bit of blue tack to keep it in place. Stick the string to the back of the cloud so the pasta dangles like rain. Then you can decorate your cloud by colouring it in or using cotton wool for a fluffy effect.
