Sparkle Recycled Jars

We throw so much stuff away. Just look in your recycling box? What do you have? I bet you have some glass jars! Take them out and give them a good wash. You can create these gorgeous light jars with them. All you need to do is cover the jar with some PVA glue and sprinkle some glitter on to the pattern. Leave it to dry and check it out! You can add a battery candle light in to it to make it a beautiful night light!!!
